FOR MECHANICAL ACTION ORGAN

by graeme shields

VITAL ORGAN PROJECT

performance notes

Because every organ is different, it's important that the performer becomes incredibly familiar with the organ on which they will perform this piece. Since the main interest lies with gradually pulling on mechanical-action stops the performer will need to pay great attention to the intricacies and tendencies of their performance instrument. There will be three stops that serve as the focal timbre for the piece: 8', 4', and 2' flutes. The performer should first find four distinct "stages" at which each stop will excite the partials of their respective pipes and then recall what they sound like for use in the performance. As an example, an approximation of the four stages for the 8' flute stop from the instrument this piece was written on are notated below:

depressed keys I II III IV (fully speaking)

wind directed to chest: the loudest possible without any sounding pitch *barely speaking: the first sound of pitch coming from all 3 notes (not partially speaking chord)* *only stipulation is that it must be distinct from II and IV* *close enough to "full" so the performer can slide into "full" with no break in pitch.*

Although the sounding pitches may be unique to this instrument, the relationship between each of these stages should be universal across all tracker-action organs. As a result, the roman numerals beneath each sounding pitch collection in the example above will be used in the score to denote which stage of the partial-pulled stop is desired. The performer will determine what each stage is on their performance instrument and "pull accordingly". The simplest advice the composer can offer to the performer is to be patient and pace your performance.

x noteheads represent starting and stopping of activity in the flute stops. *the rectangles represent mutations and mixtures which may be tiered from least present to most present (or vice versa) to match the dynamic directions given in the score.*

5" 5"

steady mutations & mixtures

the fermatas apply only to the end goal over which they occupy, not the entire gesture. In the example above, the performer should begin at the first stage, pull the stop to the second stage, and hold for 5 seconds. *the arrows in this staff are not meant to be proportional: as long as the motion is slow and steady, the performer may take as long as needed to pull or push the stop to the desired stage.*

program notes

The *intimate space* portion of the title refers to many aspects of this piece, both physical and musical. The changing pitch relationships heard throughout are the result of the organist pulling out the stops at small increments: an intimate amount of space. The aural result is a conceptually intimate difference between sonorities, dealing with microtonal harmonies. As a gross generalization, many mechanical action organs tend to have fewer pipes or available timbres than electro-pneumatic or fully electronic instruments, and therefore tend to occupy physically smaller spaces. Lastly, the success of the piece relies heavily on the intimacy of the performer/instrument relationship, requiring time spent discovering the intricacies and tendencies of the instrument.

First system of musical notation. The treble clef staff has a 4/4 time signature. The bass clef staff has a 4/4 time signature. The music features a series of chords and single notes, with a 5/4 time signature change indicated in the middle of the system.

Second system of musical notation. The treble clef staff has a 4/4 time signature. The bass clef staff has a 4/4 time signature. The music features a series of chords and single notes, with a 5/4 time signature change indicated in the middle of the system. A triplet of eighth notes is marked with a '3' in the bass clef staff.

Third system of musical notation. The treble clef staff has a 4/4 time signature. The bass clef staff has a 4/4 time signature. The music features a series of chords and single notes, with a 2/4 time signature change indicated in the middle of the system. A triplet of eighth notes is marked with a '3' in the bass clef staff.

Fourth system of musical notation. The treble clef staff has a 4/4 time signature. The bass clef staff has a 4/4 time signature. The music features a series of chords and single notes, with a 3/4 time signature change indicated in the middle of the system. A triplet of eighth notes is marked with a '3' in the bass clef staff.

Detailed description: This musical system includes a piano part (left) and a trumpet part (right). The piano part begins with a half note, followed by a half note marked 'slowly' that tapers to 'off'. The trumpet part features two half notes, each marked '2"', followed by a half note marked 'tease' that tapers to a final half note marked 'p' (piano). A circled 'IV' is positioned below the final trumpet note. Below the staves, dynamic markings 'mf' and 'p' are shown with wedge-shaped volume indicators.

Detailed description: This musical system includes a piano part (left) and a trumpet part (right). The piano part starts with a half note marked '3"' and 'full', followed by a half note marked 'p' (piano), and then a half note marked '5"' and 'full'. The trumpet part begins with a half note marked 'full', followed by a half note marked 'turn off blower' that tapers to a final half note marked 'n' (natural). Below the staves, dynamic markings 'mf', 'p', and 'mf' are shown with wedge-shaped volume indicators. To the right of the 'n' marking, the instruction 'hold until all pipe sounds have dissipated' is written.
